I there's something that defines me is side-projects. I live and breathe web dev. One of my side-projects was so huge that it could perfectly be the seed for a great startup. Giving solutions so problems people have is my expertise and the need to find news and better ways to solve problems has been always at the back of my head.

SKILLS & AREAS OF INTEREST

- Aesthetics, Ethics, Metaphysics, Nihilism
- Psychology, Ontology, Poetry, L^AT_EX
- Voluntarism, Tragedy, Fact-value distinction
- Anti-foundationalism, Philosophy of history

Project History

2016 – Present

PROJECT DEVELOPMENT TEAM – Spain
Remote kanban team member
Spain

- As a team member of a startup which aims internationally, I am proud of being part of the development team of his web app.
- Improve understanding of scrum values in complex project development
- Collaborate with team to understand items in the Product Backlog
- Deliver increment of product functionality in each sprint as set in goals
- Self-organize in how best to accomplish work
- Linting and testing code is emphasized during all the process
- Front-end technologies used are Node, React/Redux with Webpack
- Back-end technologies used are Express, Socket.io, GraphQL, MongoDB

2013 – 2016

FINCASPACE - FINCASPACE.COM – Spain
Full stack web developer
Spain

- As founder of Fincaspac, I solely developed a web app that manages the office work and documents in a homeowners' association making administrators more efficient in their communications
- Integrated user authentication with Google
- Use of Google Cloud Storage web service to store documents

- Admin manages listings for different homeowners associations, with their apartments and users, as well as listings for documents published
- Admin can publish documents that are accessible to all homeowners instantly
- Bulk communication to all homeowners possible through email templates
- Front-end technologies used are ExtJS, a JavaScript MVC framework, which created all views and actions in the app
- Back-end technologies include Symfony3, an object oriented PHP framework. Chosen for the REST API cores of the app as well as for connecting to the MySQL database.
- Finally, the app has been loaded to a PaaS service provider called OPENSIFT of RedHat, where deployment was made with Git version control.
- Wrote up technical manuals and user instructions. See <http://guia.fincaspace.com>

2011 – 2015

IGUANALOCALMEDIA – Spain
Web designer / Marketeer
 Spain

- I have over 5 years experience in the creation of websites for companies in different sectors.
- I create work that improved the visibility of clients
- Technologies used are Bootstrap and WordPress
- Notions learned range from copywriting, SEO, Google Analytics, Adwords and Facebook marketing
